MarginKite

Google Sheets + Excel

MarginKite Seller Profit Tracker: Quick Start

Thanks for buying, and welcome. This page gets you to your first real profit number in about 15 minutes.

1. Make your Google Sheets copy

1. Sign in to your Google account.
2. Open this link: **[[PLACEHOLDER: Google Sheets "make a copy" link]]**
3. Click **Make a copy**. The copy is yours, in your own Google Drive.

No link handy? Upload the .xlsx to Google Drive, open it, then choose **File > Save as Google Sheets**.

2. Or open it in Excel

Open `MarginKite-Seller-Profit-Tracker.xlsx` in **Excel 2016 or newer** (Windows or Mac). If you see **Enable Editing**, click it. There are no macros to allow.

3. Five steps to your first result

1. **Settings:** enter your hourly rate, answer the Etsy $10k question, and pick your Shopify plan, billing and payment provider.
2. **Products:** add each product with materials, packaging and labour minutes. Unit cost is worked out for you.
3. **Price Calculator:** pick a product and enter price, shipping charged and your shipping cost. Read Etsy vs Shopify profit, the price for your target margin, and when Shopify pays off.
4. **Orders Log:** add one row per order (yellow columns A–L). Fees and profit fill in.
5. **Expenses, then Dashboard:** add monthly overhead, set the first month on the Dashboard, and read your monthly profit.

Yellow cells are for typing. **Blue** cells are calculated and locked (no password). The file starts with sample data; the **Start Here** tab lists the cells to clear.

4. Fees and disclaimer

- Fees are **US Etsy and Shopify fees as of 2026-10-21**. Each rate shows its date, source and status on the **Settings** tab. When a fee changes, edit it there and the whole workbook updates.
- Rows marked **UNVERIFIED** or **ASSUMPTION** are best estimates. Check your Shopify card rate in your Shopify admin.
- All figures are **estimates**. Check them against your own Etsy and Shopify statements. This is not tax or accounting advice.
- US sellers only in this version.

5. Help

Questions or a file that won't open? Contact **[[PLACEHOLDER: support email or Etsy/Gumroad message link]]**.

MarginKite is a small shop. AI helped design and build this template, and every formula was checked against hand-worked examples. Etsy and Shopify are named for compatibility only; MarginKite isn't affiliated with either.
