MarginKite

Google Sheets + Excel

MarginKite Seller Profit Tracker: Quick Start

Thanks for buying. This page gets you to your first real profit number in about 15 minutes.

1. Make your Google Sheets copy

Sign in to Google, open a link below, and click **Make a copy**. The copy is yours, in your own Google Drive.

- **With sample data:** Make a copy: tracker with sample data
- **BLANK:** Make a copy: BLANK tracker

Which one? Use the sample-data copy to see how it works, and the BLANK copy for your own shop. No link handy? Upload an .xlsx to Google Drive and choose **File > Save as Google Sheets**.

2. Or open it in Excel

Open `MarginKite-Seller-Profit-Tracker.xlsx` (sample data) or `MarginKite-Seller-Profit-Tracker-BLANK.xlsx` (empty) in **Excel 2016 or newer**, Windows or Mac. Click **Enable Editing** if asked. There are no macros.

3. Five steps to your first result

1. **Settings:** enter your hourly rate, answer the Etsy $10k question, and pick your Shopify plan, billing and payment provider.
2. **Products:** add each product with materials, packaging and labour minutes. Unit cost is worked out for you.
3. **Price Calculator:** pick a product, enter price, shipping charged and shipping cost. Read Etsy vs Shopify profit, the price for your target margin, and when Shopify pays off.
4. **Orders Log:** one row per order (yellow columns A–L). Fees and profit fill in.
5. **Expenses, then Dashboard:** add monthly overhead, set the first month, and read your monthly profit.

Yellow = you type. **Blue** = calculated, locked with no password. The sample-data version has 5 products, 30 orders and 3 months of expenses (Start Here lists the cells to clear). The BLANK version starts empty with the same fee settings.

4. Fees and disclaimer

- **US Etsy and Shopify fees as of 2026-10-21.** Each rate shows its date, source and status on **Settings**; edit a rate there and the whole workbook updates. Rows marked UNVERIFIED or ASSUMPTION are best estimates; check your Shopify card rate in your Shopify admin.
- All figures are **estimates**. Check your own Etsy and Shopify statements. Not tax or accounting advice. US sellers only.

5. Help

Questions or a file that won't open? Email marginkite.shop@gmail.com, or message us on Etsy or Gumroad, wherever you bought it.

MarginKite is a small shop. AI helped design and build this template; every formula was checked against hand-worked examples. Etsy and Shopify are named for compatibility only; MarginKite isn't affiliated with either.
